

YOUSSEF RAJEH

London, ON | (548) 388-4360 | youssefraje@youssefraje.com

PROFESSIONAL SUMMARY

- Computer Programming and Analysis co-op student with hands-on experience developing full-stack web applications using C#, .NET Core, React, SQL Server, and modern development tools.
- Strong understanding of software development principles, databases, debugging, and structured workflows gained through academic projects and prior experience in quality-driven technical environments.
- Detail-oriented problem solver with strong analytical, documentation, and process improvement skills seeking a Summer 2026 opportunity in software development, web development, or application support.

TECHNICAL SKILLS

Programming Languages: C#, Java, JavaScript, Python, SQL

Frameworks & Web Technologies: .NET Core, React, Angular, HTML5, CSS3

Databases: SQL Server, Relational Databases

Tools & Platforms: Git, GitHub, GitLab, PowerShell, CI/CD Pipelines

Development Concepts:

- Object-Oriented Programming (OOP)
- REST APIs
- Agile & DevOps Practices
- Debugging & Troubleshooting
- Data Validation & Workflow Automation

EDUCATION

Computer Programming and Analysis – Advanced Diploma (Co-op)

Sep 2023 – Expected 2026

Fanshawe College

Relevant Coursework

- Object-Oriented Programming with C# & .NET
- Full-Stack Web Development
- Database Design & SQL
- Systems Analysis & Design
- DevOps & Agile Practices
- Data Structures & Algorithms

TECHNICAL PROJECTS

Full-Stack E-Commerce Web Application

Technologies: .NET Core API, SQL Server, React

- Developed a full-stack web application to manage products, users, and order workflows
- Designed and implemented RESTful APIs using .NET Core
- Created and managed relational databases using SQL Server
- Built responsive front-end components using React
- Applied Git version control and collaborative development practices

YOUSSEF RAJEH

London, ON | (548) 388-4360 | youssefrajeh@youssefrajeh.com

CI/CD Pipeline Implementation

Technologies: GitHub Actions, Git, .NET

- Implemented automated CI/CD pipelines for testing and deployment workflows
- Improved deployment reliability and version control processes
- Applied Agile development principles and collaborative workflow management

PROFESSIONAL EXPERIENCE

Plastic Blowing Section Supervisor

May 2020 – Sep 2022

Hoka Industry | Douala, Cameroon

- Supervised daily production operations and coordinated workflow within a fast-paced manufacturing environment
- Monitored quality control processes and ensured compliance with operational standards
- Assisted with troubleshooting production issues and improving process efficiency
- Maintained detailed operational records and documentation

Quality Control Inspector / Production Manager

Jun 2015 – May 2020

Atlas Negoce | Douala, Cameroon

Conducted inspections and validation processes to ensure product quality and accuracy

- Maintained detailed reports, documentation, and compliance records
- Collaborated with teams to improve operational workflows and production efficiency
- Supported problem-solving initiatives and process improvements in quality assurance environments

Laboratory Technician

Nov 2006 – Sep 2014

Madar Group & SICCO | Damascus, Syria

Performed technical testing, documentation, and data analysis in laboratory environments

- Followed strict quality assurance and safety procedures
- Maintained accurate records and collaborated with cross-functional teams to support operational goals

VOLUNTEER EXPERIENCE

Volunteer – Marketing Team

Sep 2025 – Present

MWN Marketing

- Supported digital content and team initiatives in a collaborative environment
- Assisted with communication and coordination of marketing-related activities

LANGUAGES

- Arabic — Native / Fluent
- English — Proficient (C2)
- French — Intermediate (B1)
